MINI SOFT SERVE MACHINE OPERATING INSTRUCTIONS

Ready to whip up some delicious soft serve!

OPERATING INSTRUCTIONS

1 POWER UP

Plug your machine into a 16amp power outlet and flip the main switch on the bottom right side panel. It's alive! Find a cool spot out of direct sunlight for your new ice cream creation station.

ALLOW 30cm CLEARANCE AROUND THE MACHINE.

2 MIX IT UP

Carefully pour half a bottle: 2.5 litres of the provided soft serve mix into the bowl. Remember, patience is a virtue! Don't overfill, or you'll have a sticky situation on your hands. (Think of it like a volcano, but instead of lava, it's a delicious mess waiting to happen.)

3 CHILL OUT

See that snowflake light? If it's flashing, the magic is happening! If it's not, press the snowflake button and choose your desired ice cream hardness with the up and down arrows (-8 being the most solid). But hey, we've already set it to -6, the sweet spot for perfect soft serve, so you're probably good to go!

4 DISPENSE THE DELICIOUSNESS

The light stopped flashing? That's your cue! Gently pull down the dispenser lever and serve. Your first soft serve masterpiece awaits!

5 KEEP THE FLOW GOING

Running low on mix? Just add more as needed - never more than 2.5 litres at a time. The ice cream party never has to stop!

6 QUICK CLEAN-UP

When you're done creating frozen masterpieces, give the machine a quick rinse with cold water and empty it. No need for a deep clean - we'll handle the rest. Easy peasy!

NEED A HAND?

If you have any questions or run into a frosty snag, give Phil a call at **082 603 3846**. He's your ice cream emergency hotline!

(Please don't email - we're too busy making ice at our inbox!)

MACHINE OVERVIEW & SPECIFICATIONS

BOWL CAPACITY:

1 x 5Lt
(Holds 2.5Lt at a time)

POWER:

350W
220V - 50Hz

DIMENSIONS:

Width: 260mm
Depth: 425mm
Height: 650mm

PREPARATION TIME:

40 - 60 min

NET WEIGHT:

28kg

FEATURES:

- Compact & Stylish Design
- Easy to Use
- Adjustable Softness Setting
- Fast Freeze Technology
- Easy Clean Components
